

**MOTOROLA**

**Date:** June 24, 2008

**Subject:** Request for additional information regarding FCC ID: IHDT56JT2

**Reference:**

Correspondence Reference Number: IHD80xxx  
Confirmation Number: xxx  
Date of Original Email: June 23, 2008

**Prepared by:**

Andrew Bachler, Principal Staff Engineer  
Motorola Mobile Device Business  
Libertyville, Illinois 60048

Questions and responses follow:

1. Please submit a more detailed Bluetooth Operational Description for the particular Bluetooth module. It appears to be a general description.

**Response:** [Please refer to the revised EX12 on BT Operational Description attached.](#)

2. Please include Bluetooth Block Diagram including clock/oscillator values.

**Response:** [Please refer to the revised EX04 on BT Block Diagram attached.](#)

3. Please provide clearer photographs of the circuit boards showing electrical tracing in Exhibit 9.

**Response:** [Please refer to the revised Exhibit 9 attached.](#)

4. Schematics appear to have WLAN capability. Please clarify for this application.

**Response:** [There is no WLAN capability in this device \(FCC ID: IHDT56JT2\). The reason WLAN is in the schematics is that this phone version is a variant of the main line PIXL \(FCC ID: IHDT56JT1\) that has WLAN capability.](#)

5. Exhibit 7A2 indicates multislots class is 10, but the other exhibits indicate up to class 12. Please reconcile.

**Response:** [Multislots class for this device is 10. Please refer to the revised cover letter EX13](#)

where the typo on class type is corrected.

6. For Exhibit 6, 22093-1, GSM 1900 EDGE Bandwidth measurement right marker should be placed further to the right most peak, to capture the entire bandwidth. Please update marker placement and bandwidth value.

**Response:** Please refer to EMC Supplement Response attached.

7. Please provide Body-Worn photograph with hands-free earpiece visible.

**Response:** Please refer to the revised SAR test setup photos Exhibit7D attached.

8. Please include 3 Tx (Class 11) Body SAR results. It is not clear whether just providing 2-Tx (Class 10) SAR data would be the worst-case Body-Worn SAR at 2.5 cm.

**Response:** Please refer to the revised SAR report with the references to GPRS/EDGE Class 10.

9. Please provide Model or FCC ID of the DUT in the SAR Plots.

**Response:** Please refer to the revised SAR report with the FCC ID on the SAR plots.

- 10.2.4 GHz Validation Plot from 3/12 is missing. Please provide.

**Response:** Please refer to the revised SAR report with the 2450MHz validation information.
