Date of Original Email:	July 30, 2010

Prepared by:

Andrew Bachler, Principal Staff Engineer
Motorola Mobile Device Business
Libertyville, Illinois 60048

Question and response follow:

1. For the T-coil assessment, please include all supplied battery types. Only the 1130mAh battery was evaluated for T-coil. Please include 1000 and 850 mAh as indicated available, for the T-coil evaluation.

Response: The 1130 mAh battery (SNN5819A) is the only battery authorized to ship with the equipment. (The other batteries are tested for SAR since they “fit” in the battery compartment.) The following is from page 59 of the user’s manual.

“To maintain the published Hearing Aid Compatibility (HAC) rating for this mobile phone, use only the original equipment battery model.”

Note: Final versions of the manual and a supplement page for the new SAR values have been uploaded.
