

Exhibit 2. Statements of Certification -- Pursuant to 47 CFR 2.907

2.1. Specification Compliance

Transceiver type described herein (IHDT56NL2) has been tested in accordance with the requirements contained in the appropriate Commission regulations. To the best of my knowledge, these tests were performed using measurement procedures consistent with industry or Commission standards, and demonstrate that this equipment complies with the appropriate standards. Each unit manufactured, imported, or marketed will conform to the samples tested herein, within the statistical variations that can be expected due to high volume production and test measurement error.

2.2. Statement of Certification

I hereby certify that the above application was prepared under my direction and that to the best of my knowledge and belief, the facts set forth in this application and accompanying technical data are true and correct.

The technical data supplied with this application was taken under my supervision and is hereby duly certified. I also certify that this transmit equipment (IHDT56NL2) is in compliance with all applicable parts of the FCC Rules.

2.3. Attestation Statement (Equipment Class DTS and DSS - Bluetooth/Wi-Fi)

This device contains an embedded Bluetooth and Wi-Fi capabilities that Motorola Mobility confirms are compliant with the applicable Part 15C regulations.

Note that, while the hardware in this implementation is capable of supporting 5 GHz operation, this device has been designed for operation solely in the 2.4 GHz band. Operation in the 5 GHz band is locked out in the device's firmware.

15.247(a)(1)

- The hopping sequence must be pseudorandom.
- All Channels are used equally on average.
- The receiver input bandwidth is approximately equal to the transmit bandwidth.
- The receiver hops in sequence with the transmitted signal.

15.247(d)

In order to ensure compliance with band edge emissions requirements at the upper end of the authorized spectrum, the conducted RF power of this device is reduced when operating on Channels 1 and 11, in the 802.11 g/n modes.

15.247(g)

The system is designed to comply with all of the regulations in Section 15.247 when the transmitter is presented with a continuous data (or information).

15.247(h)

The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.

2.4. Attestation Statement (Equipment Class PCE – CDMA 850/1900 MHz - Hearing Aid Compatibility)

Motorola Mobility hereby declares that typical production units were evaluated for Hearing Aid Compatibility (HAC) compliance.

Features List: Model – Motorola Admiral

CDMA	CDMA 1X / EV-DO Rev. A	LTE
Wi-Fi (b/g/n)	Bluetooth (Stereo)	Location-Based Services
Voice Commands	Talking Phone	Photo Camera
Video Camera	Video Player	Hands Free Speaker Phone
Music Player	HTML Browser	Text Messaging

 TITLE: Senior Resource Manager

2.5. Declaration of Available Operating Bands and Modes (Equipment Class PCE – CDMA 800/850/1900 MHz and Band 25 LTE)

Motorola Mobility hereby declares that, while this product features GSM and WCDMA capabilities that operate within frequency bands regulated by the FCC, these modes are locked out for use within the territories of the United States. These modes have been disabled in the product’s firmware, and are SIM locked by all US operators. This application, therefore, does not seek certification for these modes.
