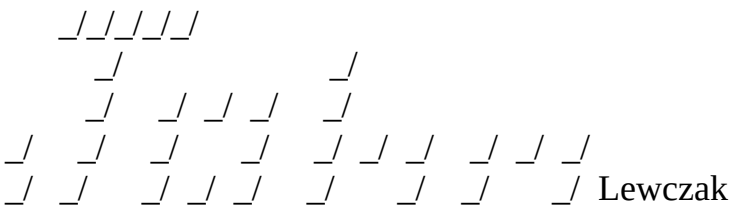
Response from applicant for exhibit changes:

Correspondence Reference Number: 127830
Form 731 Confirmation Number: TC820177
Date of Original E-mail: 07/03/2012

First, after closer examination of the situation, and the test set-up, we've found no change in ERP performance in for the PCE job. We have seen it for the NFC transmitter, as I mentioned earlier. **I've uploaded the modified exhibits**. The changes are:

- Operational Description: Changed the field strength of the NFC transmitter.
- Wi-Fi test report: Spurious emissions changed. No other changes.
- NFC Report: Field strength changes (per Op. Desc.).
- PCE test report: Corrected band-edge measurements/wording. All new conducted spurious emissions data.


Regards,
