

Exhibit 1: Identification Label -- Pursuant to 47 CFR 2.925 and 2.1033(c)(11); and RSP100, Section 5 and RSS Gen, Section 5.2.

1.1 Location

The regulatory information label (which includes the FCC ID) for this device is located on a plastic tab which can be extended from the body of the device. This tab is permanently attached to the device (see Figure 1.3.2, and also Exhibit 3).

1.2 Type

The label is of a white polyester film laminate with a pressure sensitive adhesive backing. The adhesive is a permanent type acrylic with minimum peel strength of 5 lbs/in. Because the label is protected when not extended, the long-term legibility of the markings is assured.

1.3 Markings (Text)

The FCC label shown is representative of the label that will appear on the radio when in production.

Figure 1.3.1. Representation of FCC Label information.

The above label representation is applicable to the following versions/variants of the device that is the subject of this application:

Model Number ¹	
¹ Depending upon the device version, or market into which it ships, the Model Number shown on the label may vary. All such variants will be electrically identical, consistent with the requirements of FCC Class I Permissive Change rules and guidance (47 CFR 2.1043 and KDB 178919 D01).	

This label will be placed on a permanently attached, retractable plastic tab as shown below. Other information may also be included on this label, and other labels may also be present.

Figure 1.3.2. Location of FCC Label (position, orientation, and other information shown may vary).

Please note that this label and its placement complies with the requirement of FCC Rule 47 CFR 2.925(d) that the label be permanently affixed to the product, and be readily visible to the purchaser at the time of purchase.

The placement of the label on a retractable tab is done because space is limited on the exterior of the device. Adding the ability to retract the label into a protected receptacle helps to protect the label from getting obliterated or made unreadable through regular handling and use.

The product's Market or Trade Name is indelibly printed on the face of the product, as shown in Exhibit 3.
