

## Exhibit 2. Statements of Certification -- Pursuant to 47 CFR 2.907.

### 2.1. Specification Compliance

Transceiver type described herein (IHDT56QE4) has been tested in accordance with the requirements contained in the appropriate regulations. To the best of my knowledge, these tests were performed using measurement procedures consistent with industry or Commission standards, and demonstrate that this equipment complies with the appropriate standards. Each unit manufactured, imported, or marketed will conform to the samples tested herein, within the statistical variations that can be expected due to high volume production and test measurement error.

### 2.2. Statement of Certification

I hereby certify that the above application was prepared under my direction and that to the best of my knowledge and belief, the facts set forth in this application and accompanying technical data are true and correct.

The technical data supplied with this application was taken under my supervision and is hereby duly certified. I also certify that this transmit equipment (IHDT56QE4) is in compliance with all applicable parts of the FCC Rules.

### 2.3. Attestation Statement (Equipment Class DTS and DSS - Bluetooth/Wi-Fi)

This device contains an embedded Bluetooth device, Wi-Fi device, and MOTOtalk capabilities that Motorola Mobility confirms are compliant with the applicable Part 15C regulations. Personal Hotspot operation is only supported in the 2.4 GHz band for this equipment class.

#### 15.247(a)(1)

- The hopping sequence must be pseudorandom.
- All Channels are used equally on average.
- The receiver input bandwidth is approximately equal to the transmit bandwidth.
- The receiver hops in sequence with the transmitted signal.

#### 15.247(g)

The system is designed to comply with all of the regulations in Section 15.247 when the transmitter is presented with a continuous data (or information).

#### 15.247(h)

The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.

## 2.4. Attestation Statement (Equipment Class PCE –LTE MPR/A-MPR Implementation )

Motorola Mobility hereby declares that MPR and A-MPR for LTE is permanently implemented in the DUT architecture, per 3GPP TS 36.101, as detailed in Section 12.3.10 of the Operational Description, and as stated in Section 2.2.1 of the SAR report. It is not controllable in any way by the user. The MPR is always on, but if a Hotspot power-reduced limit doesn't allow the DUT power to get up to or above that value, the MPR itself essentially has no effect. A-MPR was disabled for testing purposes.

## 2.5. Declaration of Product Equivalence

Motorola Mobility LLC hereby declares the mobile device carrying FCC ID IHDT56QE4 is electrically equivalent to the certified device carrying FCC ID IHDT56QE2 in the following areas:

- LTE/GSM/UMTS Transceiver.
- Wi-Fi transceiver.
- Bluetooth transceiver.
- Bluetooth LE transceiver.

Motorola Mobility LLC hereby declares the mobile device carrying FCC ID IHDT56QE4 is electrically equivalent to the certified device carrying FCC ID IHDT56QE5 in the following area:

- Digital control/communication (non-RF).

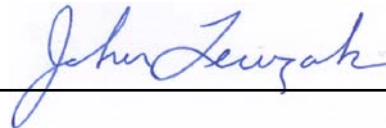

This equivalence declaration asserts that the portions of this device identified above are identical to those of the referenced device, in that they share:

- Identical circuit design and topology.
- Identical electrical components (including the antenna).
- Identical physical layout.
- Identical factory tuning and configuration.
- Identical physical characteristics of the PC Board and Housing.

Therefore, the test data already collected for the referenced device can be re-used for this device's certification.
