

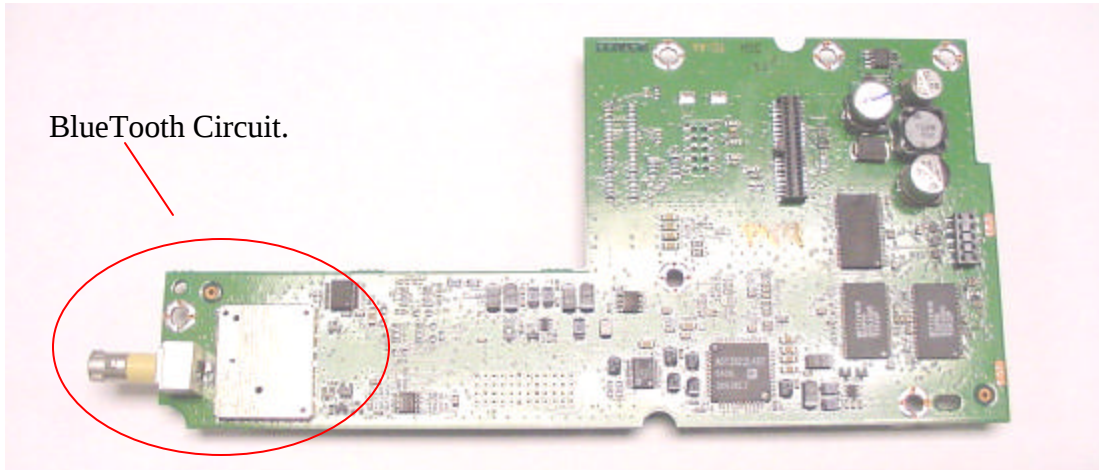

Figure 4. Internal topside view of the Bluetooth module TCU1P03\_m1202d. The Bluetooth circuit is integrated onto a pcb that is shared with the TCU.

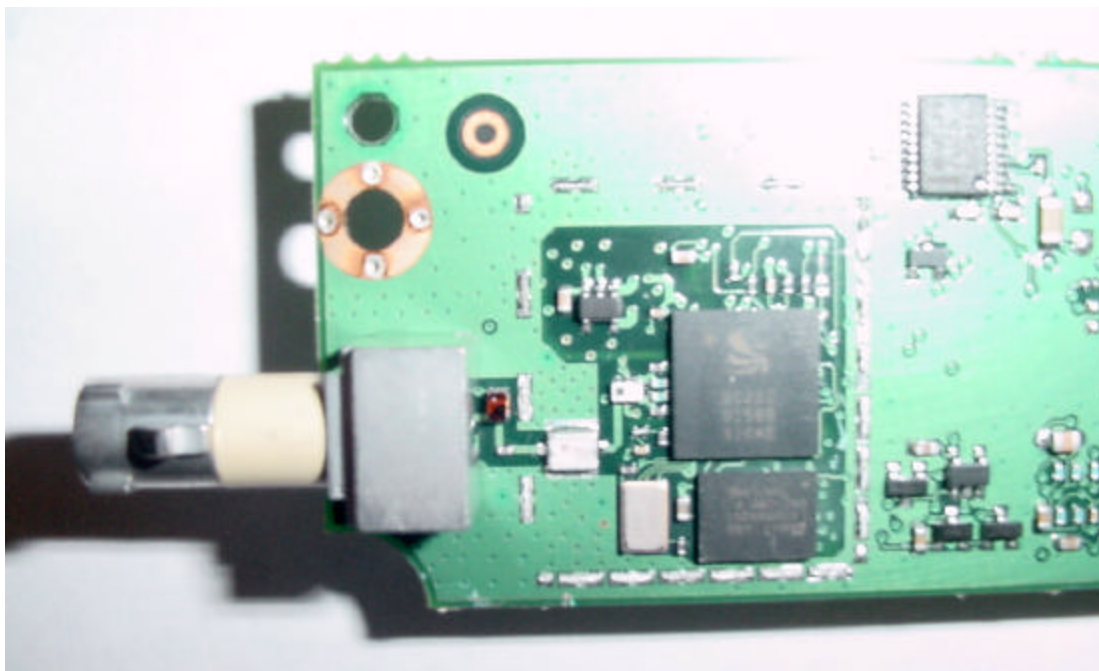

Figure 5. Close-up image of the BT circuit without the RF shield. The design is based on BC02-External Flash chip-set from Cambridge Silicon Radio. Topside view is shown in this picture.

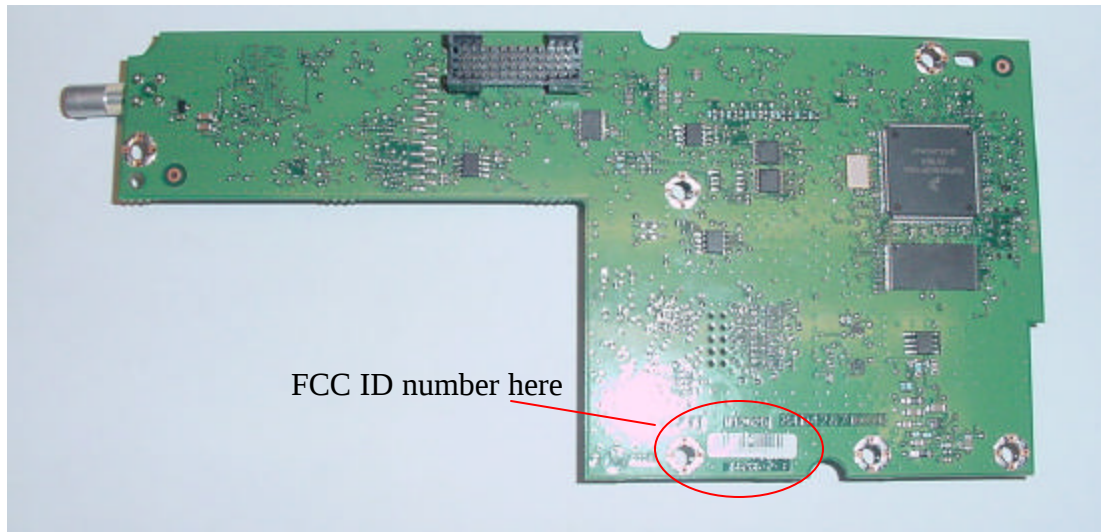

Figure 6. Internal bottom-side view of the of the BlueTooth module TCU1P03\_m1202d. Internal label with FCC ID number will be placed onto the bottom side of the pcb in the location shown in the picture.
