Always maintain awareness of your surroundings and do not stare at the connected display or become distracted by the device. Focusing on the device or its connected display could prevent you from avoiding obstacles or hazards.

Street Navigation Warnings

If your Garmin® device accepts street maps and suggests routes that follow roads, follow these guidelines to ensure safe on-road navigation. Navigation features are available only when the headset is paired with a compatible navigation device.

- Always use your best judgment, and operate the vehicle in a safe manner. Do not become distracted by the device while driving, and always be fully aware of all driving conditions. Minimize the amount of time spent viewing the device screen while driving.
- Do not input destinations, change settings, or access any functions requiring prolonged use of the device controls while driving. Pull over in

a safe and legal manner before attempting such operations.

- When navigating, carefully compare information displayed on the device to all available navigation sources, including road signs, road closures, road conditions, traffic congestion, weather conditions, and other factors that may affect safety while driving. For safety, always resolve any discrepancies before continuing navigation, and defer to posted signs and conditions.
- The device is designed to provide route suggestions. It is not a replacement for driver attentiveness and good judgement. Do not follow route suggestions if they suggest an illegal maneuver or would place the vehicle in an unsafe situation.
