

Response to E04-000083-1

1. The FRN number is 0006-8617-77.
2. A JPG block diagram file has been uploaded.
3. 78kHz clock is used in the digital circuitry only and is not associated with the transmitter, therefore testing below 14MHz is not required.
4. The test report has been revised to correct the data sheet and table.
5. A revised expository statement has been uploaded.
6. The output power on the 731 form should be 3.3 mW.
