Nemko Dallas

ATTN: Michelle Furrow

To whom it may concern,

The 8500TK and 8500D products use frequencies which are "hard coded" into the processors that allow the end user to access only those frequencies which are programmed into it. The software is written in such a way that the user cannot utilize frequencies that are not approved by the manufacturer.

Sincerely,

A handwritten signature in dark ink, appearing to read "Brad Marshall", written in a cursive style.

Brad Marshall
