Declaration of Compliance to RF Exposure Limits for Humans

The 300ST Transmitter complies with the RF exposure limits for humans as called out in 2.1091 (mobile >20 cm) or 2.1093 (portable <20 cm). The 300ST Transmitter is used to locate underground cables. It is exempt from RF Evaluation based on its operating frequency of 29.4 kHz, and output power of 115 microwatts based on $TP = (FS \times D)^2 / 30 \times 1.64$, $(2511 \text{ uV/m} \times 30)^2 / 30 \times 1.64$. This would be less than the 1.5 watt requirement for a mobile device and the 200 mW requirement for a portable device operating at 29.4 kHz.

A handwritten signature in black ink that reads "Joel T. Schneider". The signature is written in a cursive, flowing style.
