

December 19, 2001

To whom it may concern:

The Class II Change application for Super Star Tech. Co. has been filed to update the FCC Certification with information to support continued compliance of the equipment. The changes made include an external slide switch that allows a manual or remote control operation of the receiver, based on the switch position. Please find a photograph of the EUT and a test report to support the compliance.

Thank you,

Mark Warren
