

Changes Needed

The reason for this request for a Class II Permissive Change is to allow the Alcatel-Lucent (Nokia) JF6-9558L and JF6-955L-D Unlicensed products previously authorized under 15.247 to operate under the New Rules and the technical requirements of 15.407, including the emissions rules stated in 15.407(b)(ii). No change in power or hardware is required.
