Dear Helen,

1. Please find attached the revised block diagram, operation description and schematics.
2. Although IS90232 provides many applications, however, only 802.11b application is designed in this device. There is no consideration of co-location of applications for this device.
3. Please find attached the revised FCC ID label. This device is DoCed.
4. The revised test report is attached.

Best regards,

S. S. Liou

>  
> Question #1: The Block Diagram, Operational Description and Schematics  
all

> mentioned WLAN, do not specifically indicate the modulation that it  
> supports. If it has 802.11b capability only, please indicate so.

Please

> resubmit the these exhibits.

>

> Question #2: The Operational Description indicates that "The IS90232  
> integrates an USB 1.1 host controller with port transceiver. Through  
USB

> port, user can extend to wireless IA applications with IS1001  
> (BlueTooth/USB), IS2001 (802.11b/USB) and IS2101(BT-WLAN/USB)."

However the

> test report does not show that colocation test was ever performed.

Please

> provide additional test data for co-location test.

>

> Question #3: This device is a PC peripheral. Please verify the digital  
> portion is authorized through DoC or certification. If it is through  
DoC,

> please add DoC logo on the FCC label. Otherwise, please make a  
separate

> submission for digital portion.

>

> Question #4: The test report (sheet 34 of 35) shows a past-due test  
> equipment was used during out-of band conducted test. Please update  
the test

> report.
