FCC ID #: JJA-9001000101  
Confirmation#: EA467668  
731 Applicant Com Dev Wireless Group

Your e-mail requested the following:

1. Comment on Page 12 Plot 1175:

During the testing of this unit "NLT", a mobile unit, I was also testing a Base Unit "AP". When preparing the "NLT" measurements for FCC filing, inadvertently I copied a measurement of the Base Station. Please disregard the oscillogram on Page 12 of attachment D.

2. Requested Band Edge Compliance for 1850 and 1910 mhz:

Measurements have been made on Ch. 25 Low Band Edge and 1175 High Band Edge on mobile frequencies, and are attached as File 449 and 450.

Thanks for your "FYI" regarding power density.

My measurements document compliance with all FCC Rules & Regulations for this mobile unit. A grant would be greatly appreciated ASAP. Thank you.

Sincerely yours,

Radio & Tv Engineering Co.
