RE: Logitech Far East Ltd.

FCC ID: JNZYRAZ71

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) It can not be determined if the loop antenna was manipulated per ANSI C63.4:
 - For radiated measurements below 30 MHz, was the loop antenna rotated about the vertical axis?
 - Note: ANSI C63.4 suggests that for certain applications, the loop antenna may also need to be positioned horizontally at the specified distance from the EUT as well. Would this be deemed necessary in this case?. The center of the loop shall be 1 m above the ground.
- 2) FYI.....The device does not connect via a cable to a computer and therefore does not meet the definition of a PC peripheral. Therefore the DoC label does not appear necessary. Please note that the FCC commonly requires removal of DoC labels from wireless Mice and wireless Keyboards. The only part of the system that should be DoC'd is the RX. Please correct.
