EUT Description	Signo Reader
Part/Model	40V2
Date Tested	04/28/2025

APPLICABLE STANDARDS	
STANDARD	TEST RESULTS
Non-standard Test Method*	Information Only

UL Verification Services Inc. tested the above equipment in accordance with the requirements set forth in the above standards. The test results show that the equipment tested is capable of demonstrating compliance with the requirements as documented in this report.

The results documented in this report apply only to the tested sample, under the conditions and modes of operation as described herein. It is the manufacturer's responsibility to assure that additional production units of this model are manufactured with identical electrical and mechanical components. All samples tested were in good operating condition throughout the entire test program. Measurement Uncertainties are published for informational purposes only and were not taken into account unless noted otherwise.

This document may not be altered or revised in any way unless done so by UL Verification Services Inc. and all revisions are duly noted in the revisions section. Any alteration of this document not carried out by UL Verification Services Inc. will constitute fraud and shall nullify the document.

2 TEST METHODOLOGY

The 2D Passive Antenna Pattern tests documented in this report were performed using a fixed elevation and a resolution (increment) of 2° for azimuth.

The 3D Passive Antenna Pattern tests documented in this report were performed using a resolution (increment) of 15° for both elevation and azimuth.
