

02-04-2003

Kyle,

The following is the general description for our Minilink 2.4THP-90

"The DUT is a transmitter that allow the transmission of video signals to a remote receiver for viewing. The unit accepts a standard NTSC video input of 1 volt P-P at its modulation input. The unit employs FM modulation (Emission type 8M0F3F) at either of four user selectable frequencies.

Frequencies: 2456, 2463, 2470, 2477 mHz

Emission type: 8M0F3F

Power supply: 8.5-13.8 VDC @ 280 mA.

Output power: 375 mW

RF suppression features: output low pass filter"

Thanks,

Mike Henkoski
