

FCC ID: JRR24TA-900TIC

The image shows a rectangular metal component, likely a radio frequency (RF) device, mounted on a dark wooden surface. The component is made of a light-colored metal, possibly aluminum, and features a central white label with the text "FCC ID: JRR24TA-900TIC". The metal plate is secured by 12 screws arranged in a 3x4 grid. A grey cable is connected to the top of the device, and a brass-colored threaded connector is visible on the right side.
