

MICROTEK THE INTELLIGENT ALTERNATIVE.
ELECTRONICS, INC.

24 February, 2000

FCC

Attention: Examiner

To Whom It May Concern:

Please note that the application for Type Acceptance for requested I.D. JRR24TA-90IR is a modification of a previously Type Accepted product (FCC ID: JRR2.4TA-10C). In a phone conversation with Frank Coperich last week it was determined that the changes could make the new product eligible under Class Two permissive change. However we have decided, despite the similarity of the two products to request processing under a new equipment application.

Thank you.

Sincerely,

Michael L. Henkoski
