13 March 2009

RE: Worth Data, Inc.

FCC ID: JWSB5001

Response to comments from 13 Mar 2009

NCEE responses are in blue.

- 1) Please note that for IC we require to have the fax and email address of the IC Canadian contact. Please provide.

A new IC application form has been uploaded. See "ATCB-Form-IC Application 5 – Worth B500X.pdf"

- 2) The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. Kindly provide.

A new user's manual has been uploaded. See "7001_manual 2.pdf"

- 3) It is noted that external photographs appear to show Ethernet, RS232, and USB cable ports. However it is unsure how this device has been approved as a PC peripheral device. Is this a Class A device? Note that there is not a DoC label so if it is considered Class B it does not appear to be addressed. Please confirm.

A new test report has been uploaded, see "R072108-02-02G.pdf" Section 2.4 now includes the following statement:

The unit is classified as a class "A" product as it is for use in a commercial environment. It was however tested to class "B" limits, as they are more stringent, and compliance with the class "A" limits are therefore implied.
