Hi Helen,

Here are the answers.

Question #1: The setup photos show the device was tested with case removed, please provide more internal photos to show the construction of the case. Please also confirm the material the case is made of, and justify the test condition is the worst case to catch maximum emissions.
<answer>the enclosure is made of plastic and it should not have any effect on an emissions signal.

Question #2: Please update the report in the following areas:
a) In section 7.1.2, 7.1.4, only test plots are provided, no final test data as well as limit shown in test result.
b) In section 7.1.5, no test plots were provided.
<answer>pls see revised FCC/IC reports.

Thanks,

Claire
