

Dialogue Technology Corp.

10F, No. 196, Sec. 2, Jungshing Rd., Shindian City, Taipei 231, Taiwan, R.O.C.

Date: July 20, 2007

Attestation

We, Dialogue Technology Corp., hereby declare that the WLAN and 3G (WWAN) modules of V5W1BBHA (model name) will be disabled when it is used in tablet mode.

V5W1BBHA originally has an embedded detector to detect whether the device is in tablet mode. Therefore, we can release a new Firmware to disable the WLAN and WWAN transmission and disable the manual turn-on function by users when it detects the device is used in tablet mode. The new Firmware will make sure that WLAN and WWAN can not be transmitted automatically or manually, so it avoids transmission of WLAN and WWAN when the antennas touch the user body.

Should you have any questions, please have my best attention.

Sincerely yours,
