MAIN-UNIT
SIDE-A

A detailed view of the internal circuit board of a mobile phone. The board is green with gold-colored mounting pads. Key components visible include a large central processor chip labeled 'M62364-P 942200', two large memory chips labeled 'M50GW' and 'M50FW', and a battery connector on the left. Various other chips, capacitors, and resistors are scattered across the board. A yellow rectangular area is highlighted on the right side, containing several small components. The board is mounted within a yellow plastic frame.
