

## Matrix Systems

### Keypad Proximity Reader

#### MX-iCLASS External Views

We are in the process of changing our company logo and the look of the card reader. The outer shell on the left has rounded edges and a deeper texture. Both shells are made of plastic so they will not affect the RF characteristics of the card reader. We may use either outer shell in production.

The back of the card reader is enclosed by a metal plate.

FCC ID K830114405 IC:6359A-0114405  
This device complies with Part 15 of the FCC Rules.  
Operation is subject to the following two conditions:  
1) this device may not cause harmful interference, and  
2) this device must accept any interference received,  
including interference that may cause undesired  
operation of the device
