Authorization & Evaluation Division  
Federal Communications Commission Laboratory  
7435 Oakland Mills Road  
Columbia, MD 21046

Subject: Response to FCC Correspondence Number 88143 for FCC ID: K95KNGP800 with Form 731 Confirmation number TC921048.

Dear Sir or Madam:

RELM Wireless would like to have the extended frequency appear on the face of the equipment Grant of Certificate as it presently appears on the FCC Grant of Certificate for a Part 90 certification. This frequency range is regarded as usual and customary by Public Safety Users including Police, Fire, Emergency Services and their various departments.

The KNG-P800 Portable 2-Way UHF Land Mobile two way radio was designed to operate on frequencies that are in the frequency bands 764-777, 794-806, 806-824, and 851-869 MHz. Although the "794-824" is listed on the grant, for FCC Part 90 operations the intended operations are 794-805 and 806-824.

To aid equipment authorization in other countries that accept the United States FCC Grant for Certification, RELM Wireless Corp. is requesting that the FCC list the frequencies 764-869 MHz for Rule Part 90 on the Grant.

Also, for the FCC's Rule Parts 90 applications, this radio is used in systems by Federal and Public Safety agencies including Police, Fire, and Emergency Medical Services, etc. as indicated in the table on the next page. Equipment programming is the responsibility of Authorized Service Personnel. It is important to note that the radio complies with 47 CFR Part 90.203(e); in which, the operator cannot directly program the transmit frequencies using the normally accessible external controls.

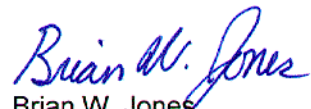

Per "FCC-OET KDB Publication 634817" guidance, the grantee, Relm Wireless Corporation, acknowledges that device operations on unauthorized frequencies are a violation of FCC Rules.

Notes Emission Designators: Rule Part 90: 11K0F3E, 16K0F3E, 8K10F1E, 8K10F1D.

<b>Frequency Range (MHz)</b>	<b>Canada</b>	<b>Part 90</b>	<b>Federal Agencies/Other Countries</b>	<b>Grant Note</b>
