Re: Applicant: General Dynamics Itronix Corporation  
FCC ID: KBCIX-GOBI2

- 1.) New Limited Modular Certification with GD6000 Host notebook PC, with the embedded Sierra Wireless, Inc., FCC ID: N7NGOBI2,
- 2.) Add co-location with the new WAN embedded in the GD6000 host for the FCC ID: KBCIX-512ANH, WLAN.
- 3.) Add to add co-location with new WAN embedded in the GD6000 for the FCC ID: KBCIX-BR-51, Bluetooth.

TCB Committee,

The GD60000 Rugged Notebook Host PC is a platform designed for use with several different radio types. These may include one or more of the following radio types: Bluetooth, WLAN and WAN. Certification have been issued for, but not limited to combinations of the following devices listed by FCC ID(s): KBCIX-512ANH (WLAN), KBCIX-BR-51 (Bluetooth), KBCIX-MC5725 (WAN), and KBCIX-MC8775 (WAN). Only one radio of each type, Bluetooth, WLAN or WAN, can be installed and used at a time.

The scope of this specific application is detailed in the following three paragraphs.

On behalf of General Dynamics Itronix, Corporation, we request a new Limited Modular Certification of the Sierra Wireless, FCC ID: N7NGOBI2, PCI Express Mini-Card Model: GOBI2, a WAN with CDMA2000, EV-DO 1xRTT, Rev A, GSM, GPRS, EDGE/EGPRS, UMTS, HSPA data capability and dual band, embedded in the GD6000, Rugged Notebook PC operating under Parts 22H & 24E. We reference the OEM, Qualcomm's, Limited Single Modular Certification test report prepared by Qualcomm, for FCC ID: J9CGOBI2000, Gobi2000 Module Part 22 & 24 Conducted Test Report: 80-VN379-203 Rev. A, for all of the OEM conducted test data.

The new Out of Band Emissions and ERP/EIRP measurements made by Northwest EMC, Inc. in Test Re[port SPTE0110 cover the integration of the GOBI2000 embedded module into the GD6000 host with its internal Skycross antenna and the external 5 dBi MaxRad magnetic mount antenna.

We also request that this certification include location in the host with the two above referenced Limited Modular or Modular Certified Intentional radiators operating under Part 15 B, 15 C, and 15 E. An exhibit addressing RF Exposure specific to this application in the host GD6000 with the KBCIX-GOBI2, KBCIX-512ANH, and KBCIX-BR-51, accompanies this request for Certification. All requested exhibits listed in TCB413 are submitted in support of this application.

Please let me know if you should require any further information.

Best Regards,

A handwritten signature in blue ink that reads "Rod Munro".
