Re: FCC ID: KDZLXE4830P

To Whom It May Concern:

The following application is submitted on behalf of our client, LXE Inc., for evaluation of their device, FCC ID: KDZLXE4830P, for a class II permissive change under FCC Part 2.932 and 2.1043.

The purpose of this application is to address the co-location of the 4830 device with FCC ID: KDZLXEMX9GSM2G. The 4830 is an LMA which has already been certified to operate in an MX9 type host device.

FCC ID: KDZLXE4830P can transmit simultaneously with FCC ID: KDZLXEMX9GSM2G therefore the combination was evaluated for radiated intermodulation products and found to be in compliance. RF exposure due to co-location was also addressed in this application with details presented in the enclosed SAR report.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
