

VEHICLE MOUNTED COMPUTER

1590 Product Data Sheet

POWERFUL AND USER FRIENDLY

Building on LXE's leadership in vehicle mounted computers, the LXE® 1590 series offers excellence in performance, ergonomics and flexibility. A 5x86 or K6 computing platform with two different LCD full-

color display sizes, and touchscreen option guarantees you the power and features to run your client/server applications and connect with your ERP system throughout your supply chain.

INDUSTRIAL ERGONOMICS

If you need a true industrial vehicle mounted computer, the LXE 1590 is your choice. Resistant to water and dust, the LXE 1590 is a top performer in any harsh environment.

Moreover, an industry-standard platform and open architecture provide a migration path to future technology, protecting your investment well into the future.

HIGH-SPEED WIRELESS SOLUTIONS

The LXE 1590 supports both 2.4 GHz frequency hopping and direct sequence spread spectrum technology for high-speed wireless data communications and demanding Windows® NT-based applications.

LXE's expertise in radio technology, on-going customer support, a full range of scanners and accessories, and the compatibility of equipment ensure maximum uptime and performance of your system.
