

CONFIDENTIALITY REQUEST LETTER

EMDIG 500HE COMPACT TRANSMITTER TECHNICAL DATA

Pursuant to FCC 0.457(d) and 0.459 of the FCC Rules we are requesting long-term confidentiality due to the fact that the applicant, Transamerica International Broadcasting, Inc., considers certain information to be submitted as trade secret information. Specifically, the schematics and parts lists submitted as exhibits for type certification for the above transmitter are not normally available to anyone outside of company employees. The specific files needing confidentiality are identified as:

Schematics EM 500 HE DIG PLUS COMPACT_1v0@1204_ING sch.pdf
BOM EM500 DIG CPT HE.pdf

The company has gone to great expense to develop the equipment and they could be financially harmed if another competitor were to copy the products using the schematics and parts list information and make new products available for sale. The parts list and schematic information contained within the exhibits submitted with this type certification application is not supplied with customer documentation. Because of the nature of the schematics and parts lists, redacted documents are not possible. At a minimum, a period of 5 years is necessary for confidentiality for these documents.

As this letter is being filed subsequently to the submission of the two files mentioned above, it is requested that the status of those 2 files be adjusted to confidential status.

Regards,

Gregory L Best, PE
