Subject: Original Application for Certification for Family Radio Service Face Held Radio  
FRS Radio, Model PF-818 / FCC ID: KHW010

Gentlemen:

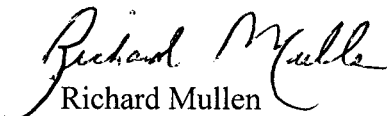

Enclosed, please find Prod-Art Company Ltd.'s application for equipment authorization dated December 14, 1999. This device is in compliance with Part 95, Subparts B and E of the FCC Rules.

The subject device is Family Radio Service face held FM transceiver with permanently attached integrated antenna. This device can operate on 14-channels with push-to-talk operation within the 462.5625~467.7125 MHz frequency band and has a maximum 20mW rated RF output power. This device is provided with continuous tone coded squelch system (CTSCC) with group codes that allows selected channel communications and can operate in either held-to-mouth talk mode or optional ear plug mode.

This FRS Radio was tested in accordance FRS rules and regulations within Part 95. Representative maximum transmitter power (ERP) tests were performed on representative channels 1 and 8 with 19.498mW measured results. Due to the low ERP, we believe SAR test data would not be required.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention in this matter.

Sincerely yours,

Richard Mullen  
Group Manager  
Product Safety & Compliance Division
