Overview

This application is for the limited modular approval of the Model DR2 DigiRadio module. The DR2 is designed to be used in DigiTrak brand devices to transmit and receive telemetry data during horizontal directional drilling applications.

The device will be installed in the applicants host device at the factory and users do not have access to alter any of the factory settings or the radio.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

A letter listing the applicable modular requirements was submitted.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
