Subject: Cover letter describing Model LT2510 family of transceivers

FCC ID: KQL-2510100

IC: 2268C-2510100

Aerocomm's LT2510 family of 2.4Ghz Frequency Hopping transceivers is made up of 2 different model numbers. The hardware platform for the LT2510 family has the option for either an integral chip antenna or a U.FL RF non-standard connector.

<u>Model #</u>	<u>Description</u>
-----------------------	---------------------------

PRM110	Populated with u.fl RF connector for external antenna option
PRM111	Populated with 2dBi chip antenna

The family will be referred to as LT2510 in all FCC and IC documentation!
