

CHANGE DESCRIPTION

Components	Old application	This Application	Function Description
L390	22nH	15nH	Modify the antenna matching circuit
L391	68nH	56nH	To stabilize the oscillator circuit.
C301	1.2pF	remove	To narrow the frequency adjustable range.
C398	1.8pF	1.2pF	To obtain a better matching circuit between the oscillator(Q310) and the amplifier (Q311).
C400	1.2pF	remove	Same as item no.1
C401	18pF	remove	Same as item no.4
