

CHANGE DESCRIPTION

Components	Old application	This Application	Function Description
L390	15nH	22nH	Modify the antenna matching circuit
L391	56nH	68nH	To stabilize the oscillator circuit.
C301	remove	1.2pF	To narrow the frequency adjustable range.
C398	1.2pF	1.8pF	To obtain a better matching circuit between the oscillator(Q310) and the amplifier (Q311).
C400	remove	1.2pF	Same as item no.1
C401	remove	18pF	Same as item no.4
