Troubleshooting:

If you feel the mouse or keyboard does not move smoothly as usual....

1. Make sure the receiver is connected to the computer.
2. Place the batteries in the correct position.
3. Make sure the batteries have enough power to operate.
4. If you use wireless mouse on the desk, which is made of metal, glass or shining material. that will affect the performance of the mouse.
5. Refer to "ID setting process" and follow the instruction to select ID code again.
6. Replace new batteries and try again.

Quickly

ACK-2080UMGD 2.4GHz Keyboard & Mouse Combo

Setup Guide & instruction

Thanks for your purchasing wireless multimedia keyboard & optical mouse kit. This wireless combo combines the slim keyboard and stylish mouse. This combination fits where you want it without compromising performance, precision, or power.

Please follow the instruction below to start using the cordless 2.4G RF product.

Quickly Setup Guide & instruction

Contents:

1. Multimedia keyboard.....1pcs
2. Wireless optical mouse..... 1pcs
3. Mini receiver..... 1pcs
4. 1.5V AA battery.....2 pcs(Keyboard)
- 5: 1.5V AAA battery.....2 pcs(Mouse)
6. User's manual.....1pcs

Features:

- 2.4GHz Radio Frequency technology.
- Slim keycap structure based on notebook keyboard.
- Only half height of common standard keyboard.
- Compact size for space saving.
- Comfortable, optical mouse shape that fits good in right hand.
- Soft touch and tactile feedback.
- Compatible with Windows ME/2000/XP/Vista.
- USB port supports "Plug and Play".

Initial your product:

1. Install two AA batteries to the Keyboard & AAA batteries to the Mouse.
Turn on the mouse power from the bottom of the Mouse.
2. Turn on your computer.
3. Connect the receiver to USB port, no need to set up the ID. The receiver will automatically link to the Mouse & Keyboard. You will see the blue led blinking when you use the Mouse & Keyboard. In the meantime, you can easily begin to use the Mouse & Keyboard.

Low Power Indicator :

When the Mouse battery power is not enough, the Low Power Indicator (Red Led) inside the mouse wheel will continue lighting. When the Keyboard battery power is not enough, the Low Power Indicator (Red Led) on the center of the keyboard will continue lighting. The Low Power Indicator reminds you to replace new batteries. Thus you can continue to use the Keyboard & Mouse smoothly.

quickly Setup Guide & instruction

Replace the Batteries :

When the Low Power Indicator is lighting, or the Keyboard & Mouse do not work anymore. Please replace 2xAA to Keyboard and 2xAAA batteries to Mouse. There are battery instructions inside the Keyboard & Mouse battery rooms. Please follow the instruction and insert the batteries in the correct position. Do not mix or use different type of battery at the same time. You DO NOT need to set up the ID after replacing the batteries. The Keyboard & Mouse will automatically link to the receiver and you can easily begin to use them again.

ID Setting Process:

There may be other reasons when the Keyboard & Mouse do not move smoothly as usual or they do not work when typing. Except replacing the batteries, you can try to reset the ID. When you try to reset the ID, please press the ID connect button on the receiver first. After the receiver button is pressed, the Blue Led indicator will begin to blink and wait for the link from Mouse and Keyboard. Press the Mouse and then the Keyboard ID connect button. The Blue Led will stop blink when Mouse & Keyboard link to the receiver. It means the ID reset is done. You can begin to use the Keyboard & Mouse smoothly.

Notice : When you reset the ID, please put keyboard and mouse close to the receiver within 3 meters.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This device complies with Part 15 of FCC RF Rules. Operation is subject to the following two conditions:

- 1) this device may not cause interference and
- 2) this device must accept any interference, including interference that may cause undesired operation of the device.
