Change description for DE900 with 12.5kHz channel spacing

Dear Ruby,

we currently have extended our pagers for narrowband applications.

DE900 has been changed to be used also for 10/12.5kHz channel spacing instead of 20/25kHz only. For this purpose the IF Filter 455 kHz is replaced:

10/12.5 kHz:	0213458	KER-Filter SMD CFWCA455KGFA-RO
20/25 kHz:	0213459	KER-Filter SMD CFWCA455KEFA-RO

Please find enclosed parts list including new components.

If you need more information, please don't hesitate to contact us.

Yours Sincerely

SWISSPHONE Telecom AG
