

Exhibit F:

L5X-PMP-04-280

DC Voltages and Current Requirements of PA

This Exhibit provides a response to Section 2.1033 (c) (8).

The dc voltages applied to and dc currents into the several elements of the final radio frequency amplifying device for normal operation over the power range.

Final frequency up-conversion and amplification take place in the Outdoor Unit (ODU). The ODU has the following voltages and currents supplied to it:

Input Voltage	+48 VDC
Current	625 mA, max
