916.5 MHz transceiver for use with RF-150 Wireless Mouse and other products.
Connects to USB port on Windows and Macintosh computers.

Draws power from computer through USB cable.

Operational Description:

See Instructions

Technical Description:

RF packets from the remote device (RF-150 Wireless Mouse, etc.) are received by the RF-015 receiver. These are either key codes, mouse moves or mouse button changes. These are passed to the computer via USB. Packets are acknowledged via an RF packet sent to the remote device. Commands from the computer are received via the USB and passed along to the appropriate device via RF.
