

Product Description:

RF-170 Wireless Laser Mouse

FCC ID L7MR170

The RF-170 is a 916.5 MHz RF mouse for use with RF-019 Wireless USB receiver. The RF-170 uses a laser-type mouse sensor.

Operational Description:

See Instructions

Technical Description:

RF packets from the mouse are sent to a RF-019 receiver. These are either mouse moves, mouse button changes, or wheel up/down/left/right commands. These are passed to the computer via USB. RF packets from the mouse are acknowledged via a reciprocal RF packet sent from the receiver to the mouse. If the mouse does not hear an acknowledgement packet, it automatically retries up to two additional times.
