Attn: Joe Dichoso  
FCC Application Processing Branch

April 11, 2000

Dear sir,

The devices with FCC ID: K7GG2488 and FCC ID:LBBGH2405 respectively are products of the same manufacturer---- Giant Electronics Ltd. The need for a separate certification application with a different FCC ID (LBBGH2405) is based on marketing considerations only.

As far as the differences between the devices, they are outlined as follows:

- 1) The two devices are identical as far as circuit design, P.C.B. layout, RF module layout, RF module circuit design and functionality. Their difference lies in the location of the LED indicators on the base unit. It should be noted that they are placed on a P.C.B separated from the main base P.C.B. . The main P.C.B. is identical in both devices.
- 2) An extra phone jack is provided for K7GG2488. However, for LBBGH2405, the extra jack is disabled by not applying the phone jack component only. The P.C.B. layout remains identical in both devices.

Best Regards,

  
Alan Poon

Senior Engineer Manager  
Giant Electronic Ltd.
