Hello! Mike,

Thank you for your help.

Please find below for our explanation:

1. Attached please find the lost page, please kindly add it to the original user's manual.

2. Yes, the operational frequencies are 27.095 - 27.195 MHz.

If you have any further questions, please kindly let me know.

Best regards,

K. C. Chen  
ETC/EMC Department II

Notice\_content

-----

Question #1: User Manual does not contain information required under 15.21 of FCC rules. Please provide revised user manual.

FYI: In the future submission, please make sure to indicate the operating frequencies on the TCB application form. Do not indicate the Frequency Band per FCC rules. In addition, in your test report, please also indicate the operating frequencies but the frequency band. For this application, the operating frequencies is 27.095-27.195MHz. Please confirm.

Best Regards

Mike Kuo / TCB Certifier

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in

application dismissal and Forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
