RE: FCC ID: LJPNSB-9

Attention: Kare Oksanen

I have a few comments on this Application.

- 1 Please provide an internal photo of the bottom side of the PCB.
- 2 The theory of operation states that a Stereo FM receiver is contained in the device. Please note that this makes the device a part 15 device also subject to the FM receiver requirements of Part 15. As such the appropriate Part 15 statements must be on the device unless the exception of 15.19(a)(5) can be met. Please note that the label and device appears large enough to contain the required 15.19(a)(1) statement. Please revise the FCC ID label to incorporate this statement. Alternately, please provide evidence that the product can meet the exception of 15.19(a)(5) (i.e. device too small or it is not practical to place the statement on the device). Please note, you must provide sufficient cause in order to have the label in the manual and not on the device (size being the primary factor).
- 3 Your manual does not appear to contain the SAR values for this phone. Please note that the FCC states that these values are to be provided to the user in the manual. Please list the SAR values for head and body SAR as measured in the SAR report.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
