Attention: Mike Kuo

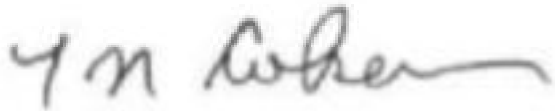

Applicant: Alvarion Ltd.
Class 2 Permissive Change Application
FCC ID: LKT-VL-53

Dear Mike,

On behalf of my client Alvarion I am applying for a class 2 permissive change for the referenced device. The changes made to the EUT are described in the operational description. The frequency generating circuitry is essentially identical to the previous version but uses a new chip set. The power output is the same, the power amplifier has been changed to another vendor but has the same footprint as the original. Finally the values of some filters have been changed to allow operation on different channel bandwidths.

If you have questions or need further information, please don't hesitate to contact me.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant/Agent for Alvarion Ltd.
