RE: Application for obtaining a transmitter approval
Attached Application Form 731

FCC ID: LLB11009X3

Dear Sir or Madam:

Aclara Technologies LLC wishes to obtain approval for a telemetry transceiver with FCC ID LLB11009X3.

The LLB11009X3 transceiver is used to transmit data from a utility meter to a data collection unit. The LLB11009X3 Transceiver device is the 2-way communication device, which includes a transmitter and a receiver.

Complete information about LLB11009X3 device is documented in the attached application documentation including schematic, bill of material, photographs, block diagram, user manual, operation description, The LLB11009X3 transmitter was tested for conformance to the technical requirements of 90.201 Subpart I-General Technical Standards. Results of tests are attached to this application.

The LLB11009X3 was found to comply with all technical requirements of 90.210.

Sincerely,

Larry Murphy
Executive Director of Engineering
