Columbia, MD 21046

To whom it may concern:

Cervis, Inc. hereby requests a Permissive Change Class II of the radio equipment certification for the Smart RT Module SRF309 Type 3 certification number, FCC ID: LOBSRF309. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry: Accessory LED and display circuits have been rearranged to be compatible with an older form factor RT module. No changes that affect the independent RF circuits.
- (b) Functional capabilities: The functional capabilities of the RF circuits have not been changed.
- (c) Antenna Characteristics: The antenna options are unchanged.
- (d) Cosmetic differences: The Type 3 module is physically more compact, 2.500" wide by 3.350" tall.
- (e) Other: None.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

A handwritten signature in black ink that reads "Anthony M. Di Tommaso". The signature is fluid and cursive, with "Anthony M." on top and "Di Tommaso" on the line below.

Anthony M. Di Tommaso
Director of Product Development & Quality
