RE: Eagle Wireless  
FCC ID: LOK450PA-2

I have the following comments about this Application. Please address

- 1.) No manual was received. A copy of either the owner's manual and/or installation manual must be submitted. See 2.1033(c)(3)
  - 2.) Internal and External photographs must be submitted as separate exhibits. Inside photographs must also show both sides of printed wiring boards. Please submit one to a page and follow the guidelines of 2.1033(c)(12)
  - 3.) Please supply a parts list. This can be held confidential if listed on Request for Confidentiality letter. There are no extra fees for Confidentiality.
  - 4.) There are a multitude of plots in \*.jpg format uploaded to the RF Exposure Information exhibit. I would be berated repeatably with a wet noodle if I uploaded all the plots this way. Please combine into a single document. I recommend inserting into a Word document and then converting to \*.pdf format. This document should then be uploaded to the TEST REPORT exhibit.
  - 5.) Can this device operate over a range of output power levels? If so, it should be stated on Form 731.
  - 6.) Please extract and provide Operational Description of all devices that suppress spurious radiation and limit power per 2.1033(c)(10)
  - 7.) Will the Ritron DTX454 be the only exciter used with this device?
  - 8.) All label and label placement should be submitted as a separate exhibit. Please extract from your test report.
  - 9.) Proposed Grant notes:
- "Power Output listed is Conducted. The antenna(s) used for this transmitter must be fixed-mounted on outdoor permanent structures. RF exposure compliance is addressed at the time of licensing, as required by the responsible FCC Bureau(s), including antenna co-location requirements of §1.1307(b)(3). Approved for use with Ritron DTX454 only"

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
