Re: Model Number: SNab1
FCC ID: LPM4000A
Applicant: Select Comfort Corporation

To Whom It May Concern:

We are seeking certification for the Foundation Interface box, Model Number SNab1, FCC ID: LPM4000A under FCC 15.247. The device connects to the wired control port on up to two adjustable foundations and uses a 2.4GHz transceiver to communicate with other Select Comfort products, including the Bridge device. This Foundation block will allow easy control of the adjustable foundation which will give the ability to not only control the position of the foundation but also the many massage settings of the unit.

The device utilizes a PCB etch antenna that is integral antenna to the unit. It is compliant with the unique antenna connector requirements of FCC 15.203.

The digital portion of the device has been FCC Class B verified.

Test reports and other technical exhibits have been submitted to demonstrate compliance with FCC 15.247 requirements.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jeffrey Barnum", followed by a horizontal line.

Jeffrey Barnum
