

Operation Description

1:32 Remote Control NASCAR Monte Carlo Version 27MHz

The 1:32 Remote Control NASCAR Monte Carlo Version 27MHz RC Car is powered by 2 X 1.5V battery for Transmitter. There are four buttons on the front side of body. When the forward or backward button is pressed, it will transmit a radio frequency for receiver go forward or backward. When the left or right button is pressed, it will transmit a radio frequency for receiver go left or right.

Refer to the transmitter circuit design, the circuit description is listed as below:

- ❑ X1 and associate circuit act as oscillator.
- ❑ L2, L3 & L4 and associate circuit act as RF Amp.
- ❑ R3 and associate circuit act as oscillator for encoder.
- ❑ U1 and associate circuit act as encoder.
