7435 Oakland Mills Road  
Columbia, MD 21046

Dear Sirs,

This letter is being submitted regarding Digitrax, Inc. submittal for FCC ID: LV3RF1.

The EUT submitted in this report is a modular transceiver. This transceiver has been previously approved in Model DT100R throttle controller under FCC ID: LV3DT100R. For purposes of this application, the EUT was tested as a stand alone device in order to submit the Transmitter board for modular approval. The EUT will only be used in Digitrax, Inc. products and in similar packaging arrangements as previously approved. The EUT meets all of the module design requirements except for the requirement for having its own RF shielding. Technical Information regarding these issues has been supplied to the uploaded to the FCC in the Operational Description Folder. Since the EUT does not meet with the shielding requirements, the wish to pursue a "Limited Modular Approval" (LMA).

I hope that you find that this information fulfills the necessary FCC requirements for the Part 15 Certification requirements. If you have any questions, please feel free to contact me at (770)741-0717.

Sincerely,

Timothy R. Johnson  
NARTE Certified EMC Engineer
